How all Things were Created is Recorded by MOSES.

Before the Earth, the Sea, and Heavens were framed,
 One face had Nature, which they *Chaos* named,
 An indigested Lump, a barren load,
 Where jarring Seeds of things ill joyn'd abode.
 No Sun as yet with light the World adorns,
 Nor new Moon had repair'd her waning Horns:
 Nor hung the self poyz'd Earth in thin Air plac'd,
 Nor had the Ocean the vast shores imbrac'd.
 Earth, Sea, and Air, all mixt; the Earth unstable;
 The Air was dark, the Sea Unnavigable,
 No certain form to any one assign'd,
 This that resists, for in one body joyn'd
 The cold, and heat, the dry and humid fight,
 The soft and hard, the heavy with the light.

A succinēt Computation of memorable things to this present Year, 1690.

The Four Seasons of this Year 1690. with
their Natural Dispositions.

The Spring begins on Munday, March 10th: the Sun entering into the Æquinoctial Sign Aries, making our days and nights equal: which Season will prove drie and windie ; with some rain.

The Summer Season begins on Wednesday, June 11th. the Sun then entering into the Tropick Sign Cancer, making our dayes longest, and our nights shortest : which Season is like to prove Temperate .

The Autumn or Harvest Season, begins on Friday September 12: the Sun entering into the 2d Æquinoctial Sign Libra, making again our days and nights equal: which Season seems to prove something changeable, with smal rains.

The Winter Season begins on Thursday, December 11: the Sun entering into Capricorn, making the shortest day and longest night : which Season is like to produce rain, but by all propability will prove windie, with much snow, and great frosts.

My Author will reflect on no person, but keeps clos to his Predictions ; But know, More Men shall die than Women, and more shall die than sick ; and some die which never will be well known, this Year.

An exact Everlasting Tyde-Table, to show all our brave Sea-men
 and Travellers, the exact time of High-Water, or full Sea, into all
 the Northren-Harbours, betwixt *Lieth* and *Inverness*, according to
 the Age of the Moon, which any intelligent person may easily under-
 stand. And to know at any time, how many days old the Moon is, no-
 thing is better then your *Tearly Almanacks*, for to reckon from the
 day of the Change: but know, if the Change be before 12 a clock of
 the day, then the same day is the Prime, or first day of the Moon: but
 if the Change be after 12, then the next day is the Prime or first day.
